

Volume 17, Issue 2, Pages 71-170 (February 2007)

Gene-environment Interaction in Relation to Obesity, Diabetes and Cardiovascular Disease

Edited by José M. Ordovas

Editorial

Introduction • EDITORIAL

Pages 71-73

José M. Ordovas

Review Articles

Assessment of usual dietary intake in population studies of gene–diet interaction

• REVIEW ARTICLE

Pages 74-81

Katherine L. Tucker

Methodological aspects of the assessment of gene–nutrient interactions at the population level

• REVIEW ARTICLE

Pages 82-88

Sergio Cocozza

Application of nutrigenomic concepts to Type 2 diabetes mellitus • REVIEW ARTICLE

Pages 89-103

Jim Kaput, Janelle Noble, Betul Hatipoglu, Kari Kohrs, Kevin Dawson and Amelia Bartholomew

Gene–lifestyle interaction on risk of type 2 diabetes • REVIEW ARTICLE

Pages 104-124

Paul W. Franks, Jose-Luis Mesa, Anne Helen Harding and Nicholas J. Wareham

Metabolic syndrome pathophysiology: The role of adipose tissue • REVIEW ARTICLE

Pages 125-139

Martin Laclaustra, Dolores Corella and José M. Ordovas

Gene–alcohol interactions in the metabolic syndrome • REVIEW ARTICLE

Pages 140-147

Dolores Corella

Gene–environment interaction and its impact on coronary heart disease risk • REVIEW ARTICLE

Pages 148-152

Philippa J. Talmud

Gene by sex interaction in the etiology of coronary heart disease and the preceding metabolic syndrome • REVIEW ARTICLE

Pages 153-161

Jeanette J. McCarthy

Environmental toxicity, nutrition, and gene interactions in the development of atherosclerosis • REVIEW ARTICLE

Pages 162-169
